Mobility Computing

Providing Location Freedom

Extending the office beyond the walls

Mobile computing is here to stay. New mobile devices are flooding the market every day with prices dropping and features increasing such that the old business model of "the walled office" is now obsolete. We provide pervasive computing anywhere and anytime by everyone getting the right information to the right party at the right time for the right action.

In this first of a kind Mobile suite are applications tailored for vertical businesses that reduce productivity issues associated with the day-to-day demands of active and mobile workers. The broad nature of business activities as well as the need for real time information has moved the mobile work product to the center stage. Remote mobile capability and improved mobile device support enables computing anytime and anywhere ultimately driving Mobile Internet Device (MID) usage benefiting the Enterprise. Pervasive use of browser based technology combined with the proliferation of 3G Mobile handsets and MIDs make phone and device compatibility a non-issue.

Mobile Advantages

Information Anytime and Anywhere on any device

Mobile technologies are changing every day. Inspira understands that all Enterprises are not the same. We listen to your requirements and propose the best solution as well as customize and extend specific applications to meet your unique needs. Additionally, Mobile UI can be awkward due to screen size limitation. We make intuitive user interfaces that make navigation seamless.

Mobile applications:
- **Provide Information flow In Real Time**
- **Improves internal Communications**
- **Remotely execute projects and work product**
- **Fits well with disparate work groups -- de-centralization**
- **Reduces need to be in office – Extends the Enterprise**
- **Enhances Productivity**

Mobility Computing

Providing Location Freedom
